Technical Requirements for the Testing and Approval of Devices **DVGW GW 335-A6 (P)** December 2015

**Plastics Piping Systems for Gas and Water Supply;
Requirements and Testing; Part A6: PA-U 160 and PA-U 180 Pipes
and their Joints and Connections**

GAS

WATER

Warning

This English-language version is an informal translation from the German original. However, only the original German-language version has been exclusively authorised by the DVGW and its Technical Bodies. The DVGW reserves the right to revise this version at any time due to possible translation errors.

Anybody is free to use the DVGW system of rules. Users are responsible for the proper use of the DVGW system of rules in each individual case.

The DVGW is the technical and scientific association of gas and water engineers and comprises approximately 14,000 members. For more than 150 years, the DVGW has been setting the technical standards for the safe, secure and reliable supply of gas and water, actively initiating the exchange of ideas and information in the gas and water sectors and encouraging and promoting on-going progress in the sectors through practical guidance.

The DVGW is an independent non-profit organisation free from economic lobbyism and political influence.

The DVGW Set of Rules is a key instrument for the DVGW to meet its statutable purpose and accomplish its tasks. The DVGW Set of Rules notably defines, on the basis of statutory regulations, the requirements on technical safety, hygiene, environmental protection, fitness for use and consumer protection and organisation for the supply and use of gas and water. The DVGW Set of Rules ensures that the DVGW complies with the statutory principle of self-responsibility of the utilities, for the benefit of technical safety and hygiene as well as environmental and consumer protection.

Contents

Foreword	5
1 Scope	6
2 Normative references	7
3 Requirements and testing	9
3.1 Quality management, test samples, scope of testing/ monitoring, product groups	9
3.2 Colour	13
3.3 Density	13
3.4 Water content (including volatile components).....	13
3.5 Solution viscosity	13
3.6 Thermal analysis (DSC).....	13
3.7 Weathering resistance	13
3.8 Fast crack propagation.....	14
3.9 Slow crack growth	14
3.10 Weldability	14
3.11 Resistance to chemicals (gas only)	15
3.12 Hygiene (water only)	15
3.13 Condition (including storage and delivery form)	15
3.14 Dimensions.....	15
3.15 Heat ageing (pipes).....	15
3.16 Homogeneity	16
3.17 Elongation at break (pipes)	16
3.18 Electrical properties (electrofusion fittings)	16
3.19 Internal pressure fatigue strength (pipes)	16
3.20 Burst pressure (pipes)	17
3.21 Internal pressure fatigue strength (welds)	17
3.22 Tensile fatigue test (electrofusion welds).....	17
3.23 Peeling resistance (electrofusion sockets)	17
3.24 Impact resistance (electrofusion saddle joints)	17
3.25 Tensile strength (buttweldings)	18
3.26 Labelling.....	18
Annex A (normative) – Preparation for weld testing	20

Foreword

These Technical Requirements for the Testing and Approval of Devices have been prepared by the project group "Plastics in Gas and Water Supply Systems" on behalf of the Technical Committees on "Gas Distribution", "Gas Transmission Lines" and "Water Supply System Components".
